

FR SKATES SIZE CHARTS

SL SPEED / SL SPEED 195

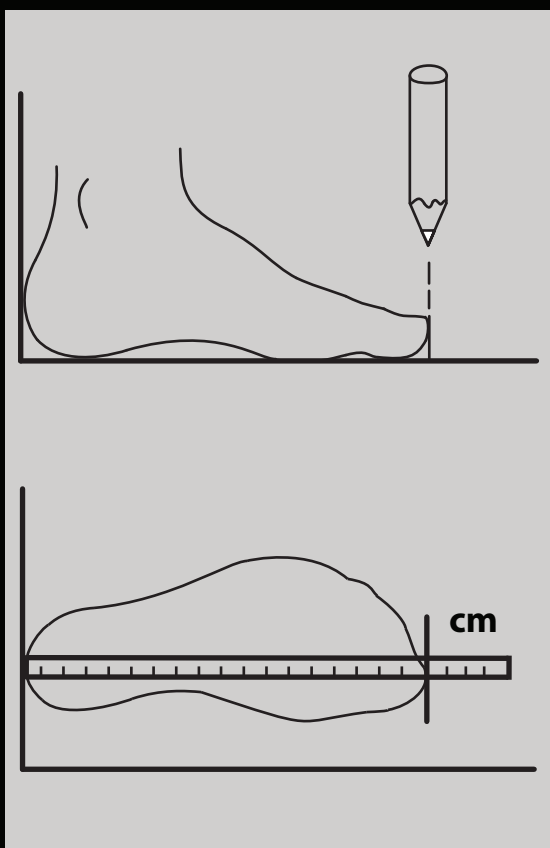

To find your correct size, first refer to your current shoe size. For a more accurate measurement, use this method: Place a sheet of paper against a wall on a hard-surfaced floor. Place your heel against the wall and outline your feet one at a time. Measure the distance from heel to toe in centimeters. Use the longest measurement to match your best fit on the size chart below. The table considers the original liner size, without any additional footbed.

SL SPEED Skates are equipped with integrated Intuition heat-moldable liners, for an optimized fit. To mold the liners, refer to the molding instructions following below link. Before molding, try both skates on with any footbeds/orthotics you intend to use, to ensure they fit your feet properly.

Not too tight, not too sloppy ! **Do not mold if the skates don't fit !**

CHECK FOR PROPER FIT

When trying on the skates the toes shouldn't be pressed against the front of the skate and should lay flat. Toes can touch slightly the front of the skates, without pressure point.
